Examines the main theories of dynamics, their original inception and their evolution over time into contemporary foundational theories.

(Black & White version) Fundamentals of Business was created for Virginia Tech's MGT 1104 Foundations of Business through a collaboration between the Pamplin College of Business and Virginia Tech Libraries. This book is freely available at: <http://hdl.handle.net/10919/70961> It is licensed with a Creative Commons-NonCommercial ShareAlike 3.0 license.

Artificial Intelligence presents a practical guide to AI, including agents, machine learning and problem-solving simple and complex domains.

This product is a complete reference to both classical material and advanced topics that are otherwise scattered in sometimes hard-to-find papers. A major effort in writing the book was made to highlight the intuitions behind the theoretical development.

Right now, 70% of Americans aren't passionate about their work and are desperately longing for meaning and purpose. They're sick of "average" and know there's something better out there, but they just don't know how to reach it. One basic principle?The Proximity Principle?can change everything you thought you knew about pursuing a career you love. In his latest book, *The Proximity Principle*, national radio host and career expert Ken Coleman provides a simple plan of how positioning yourself near the right people and places can help you land the job you love. Forget the traditional career advice you've heard! Networking, handing out business cards, and updating your online profile do nothing to set you apart from other candidates. Ken will show you how to be intentional and genuine about the connections you make with a fresh, unexpected take on resumes and the job interview process. You'll discover the five people you should look for and the four best places to grow, learn, practice, and perform so you can step into the role you were created to fill. After reading *The Proximity Principle*, you'll know how to connect with the right people and put yourself in the right places, so opportunities will come?and you'll be prepared to take them.

An engineering professor who started out doing poorly in mathematical and technical subjects in school offers tools, tips and techniques to learning the creative and analytical thought processes that will lead to achievement in math and science. Original.

Foundations for Community Health Workers Foundations for Community Health Workers is a training resource for client- and community-centered public health practitioners, with an emphasis on promoting health equality. Based on City College of San Francisco's CHW Certificate Program, it begins with an overview of the historic and political context informing the practice of community health workers. The second section of the book addresses core competencies for working with individual clients, such as behavior change counseling and case management, and practitioner development topics such as ethics, stress management, and conflict resolution. The book's final section covers skills for practice at the group and community levels, such as conducting health outreach and facilitating community organizing and advocacy. Praise for Foundations for Community Health Workers "This book is the first of its kind: a manual of core competencies and curricula for training community health workers. Covering topics from health inequalities to patient-centered counseling, this book is a tremendous resource for both scholars of and practitioners in the field of community-based medicine. It also marks a great step forward in any setting, rich or poor, in which it is imperative to reduce health disparities and promote genuine health and well-being." —Paul E. Farmer, MD., PhD, Maude and Lillian Presley Professor of Social Medicine in the Department of Global Health and Social Medicine at Harvard Medical School; founding director, Partners In Health. "This book is based on the contributions of experienced CHWs and advocates of the field. I am confident that it will serve as an inspiration for many CHW training programs." —Yvonne Lacey, CHW, former coordinator, Black Infant Health Program, City of Berkeley Health Department; former chair, CHW Special Interest Group for the APHA. "This book masterfully integrates the knowledge, skills, and abilities required of a CHW through storytelling and real life case examples. This simple and elegant approach brings to life the intricacies of the work and espouses the spirit of the role that is so critical to eliminating disparities—a true model educational approach to emulate." —Gayle Tang, MSN, RN., director, National Linguistic and Cultural Programs, National Diversity, Kaiser Permanente "Finally, we have a competency-based textbook for community health worker education—well informed by seasoned CHWs themselves as well as expert contributors." —Donald E. Proulx, CHW National Education Collaborative, University of Arizona

Learn state-of-the-art methods for making logically sound decisions when faced with multiple conflicting objectives and uncertainty.
