Anthropology is the study of all humans in all times in all places. But it is so much more than that. "Anthropology requires strength, valor, and courage," Nancy Scheper-Hughes noted. "Pierre Bourdieu called anthropology a combat sport, an extreme sport as well as a tough and rigorous discipline. ... It teaches students not to be afraid of getting one's hands dirty, to get down in the dirt, and to commit yourself, body and mind. Susan Sontag called anthropology a "heroic" profession." What is the payoff for this heroic journey? You will find ideas that can carry you across rivers of doubt and over mountains of fear to find the light and life of places forgotten. Real anthropology cannot be contained in a book. You have to go out and feel the world's jagged edges, wipe its dust from your brow, and at times, leave your blood in its soil. In this unique book, Dr. Michael Wesch shares many of his own adventures of being an anthropologist and what the science of human beings can tell us about the art of being human. This special first draft edition is a loose framework for more and more complete future chapters and writings. It serves as a companion to anth101.com, a free and open resource for instructors of cultural anthropology. This 2018 text is a revision of the "first draft edition" from 2017 and includes 7 new chapters.

One of the most popular anthropological case studies published in the last two decades, the latest edition of The Gebusi incorporates important new fieldwork, bringing ethnographic excellence and a riveting story fully up to date. Readers are welcomed into the lives of Papua New Guinea rainforest dwellers to witness a dramatic arc of cultural change and human transformation. When Knauff first studied them, Gebusi practiced powerful spirit séances and sorcery divinations, held resplendent initiations that included distinctive sexual customs, and endured high rates of violence. Sixteen years later, he found them participating in market activity, schooling, government programs, and sports; performing their own popular music; and practicing Christianity. More recently, Gebusi have been battered by economic hardship and withdrawal of government services; but have admirably revitalized their culture and livelihood. Sustained by traditions, access to land and waterways, and a keen sense of humor and vitality, Gebusi exhibit resilience and dignity amid conditions of continuing uncertainty and change. An absorbing, well-written, and humanistic account based on profound scholarship, The Gebusi, 4/E includes end-of-chapter "Broader Connections" that link Gebusi experiences to major anthropological topics: subsistence, kinship and marriage, politics, religion, gender and sexuality, ethnicity, nationalism, modernity, and the ethics of engaged and applied anthropology. A stunning full-color photo insert accentuates Knauff's absorbing narrative. Callouts to instructional videos recorded with Gebusi and to an extensive online image bank on the author's website further enrich the ethnography.

This book synthesizes the flourishing field of anthropology of infectious disease in a critical, biocultural framework. Leading medical anthropologist Merrill Singer holistically unites the behaviors of microorganisms and the activities of complex social systems, showing how we exist with pathogenic agents of disease in a complex process of co-evolution. He also connects human diseases to larger ecosystems and various other species that are future sources of new human infections. Anthropology of Infectious Disease integrates and advances research in this growing, multifaceted area and offers an ideal supplement to courses in anthropology, public health, development studies, and related fields.
