In Build Your Own Kit Car, renowned kit car expert Steve Hole presents a comprehensive guide to planning, managing and executing a kit car build. The first part of the book covers the history of kit cars; detailing the innovations the kit car

industry has made in car building technology, and how companies like Westfield and Caterham have become household names. The second half of the book takes you through a full build project, from chassis, brakes, suspension and engine through to trimming and interiors. Other topics include: Types of kit cars, including the differences between kits, replicas and one-off builds; Choosing the right car for you; Budgeting for your build; Setting up your workspace, tools needed and workshop safety; Building techniques; List of useful contacts to help find the best resources for your kit car build. Whether you are planning on building a blisteringly quick trackday car, classic roadster or eccentric road car, *Build Your Own Kit Car* has all the resources and information you need to build and enjoy your own unique automotive creation. A comprehensive and instructional guide to planning, managing and executing a kit car build, superbly illustrated with 300 colour photographs. Steve Hole is one of the UK's leading authorities on the world of kit cars and is editor of *tkc* magazine.

The epic story also told in the film *FORD V. FERRARI*: By the early 1960s, the Ford Motor Company, built to bring automobile transportation to the masses, was falling behind. Young Henry Ford II, who had taken the reins of his grandfather's company with little business experience to speak of, knew he had to do something to shake things up. Baby boomers were taking to the road in droves, looking for speed not safety, style not comfort. Meanwhile, Enzo Ferrari, whose cars epitomized style, lorded it over the European racing scene. He crafted beautiful sports cars, "science fiction on wheels," but was also called "the Assassin" because so many drivers perished while racing them. *Go Like Hell* tells the remarkable story of how Henry Ford II, with the help of a young visionary named Lee Iacocca and a former racing champion turned engineer, Carroll Shelby, concocted a scheme to reinvent the Ford company. They would enter the high-stakes world of European car racing, where an adventurous few threw safety and sanity to the wind. They would design, build, and race a car that could beat Ferrari at his own game at the most prestigious and brutal race in the world, something no American car had ever done. *Go Like Hell* transports readers to a risk-filled, glorious time in this brilliant portrait of a rivalry between two industrialists, the cars they built, and the "pilots" who would drive them to victory, or doom.

Share in the trials and tribulations of turning a bare frame and wrecked Miata into a racetrack demon, and learn how to build a sports car of your own along the way. This book provides specific answers to common questions and covers the entire building process, including the post-build fine-tuning of the car that is necessary to extract the car's full performance (and fun) potential.

A comprehensive overview of developments in augmented reality, virtual reality, and mixed reality—and how they could affect every part of our lives. After years of hype, extended reality—augmented reality (AR), virtual reality (VR), and mixed reality (MR)—has entered the mainstream. Commercially available, relatively inexpensive VR headsets transport wearers to other realities—fantasy worlds, faraway countries, sporting events—in ways that even the most ultra-high-definition screen cannot. AR glasses receive data in visual and auditory forms that are more useful than any laptop or smartphone can deliver. Immersive MR environments blend physical and virtual reality to create a new reality. In this volume in the MIT Press Essential Knowledge series, technology writer Samuel Greengard offers an accessible overview of

developments in extended reality, explaining the technology, considering the social and psychological ramifications, and discussing possible future directions. Greengard describes the history and technological development of augmented and virtual realities, including the latest research in the field, and surveys the various shapes and forms of VR, AR, and MR, including head-mounted displays, mobile systems, and goggles. He examines the way these technologies are shaping and reshaping some professions and industries, and explores how extended reality affects psychology, morality, law, and social constructs. It's not a question of whether extended reality will become a standard part of our world, he argues, but how, when, and where these technologies will take hold. Will extended reality help create a better world? Will it benefit society as a whole? Or will it merely provide financial windfalls for a select few? Greengard's account equips us to ask the right questions about a transformative technology.

Ford's 4.6-liter-powered Mustang is the last remaining "classic" muscle car in the world and is incredibly popular with performance enthusiasts. More than 1,000,000 Mustangs have been built since 1996. Covers all 4.6 and 5.4-liter "Modular" motors--Ford's only V8 engine for Mustangs, fullsize cars, and light trucks from 1996 to 2004.

This fully-illustrated guide covers general principles and tuning theory, tuning for extra zest, performance exhaust systems, upgrading the ignition system, overhauling and fitting a Weber DGAV 32/36 carburetor, and more for getting the most from your engine.

The 5.0-liter performance wave has propelled Ford's Windsor small block to the top of the performance heap. Ford Windsor Small-Block Performance is a comprehensive guide to the tips, tricks, and techniques of top Ford performance experts that will help Fords or Mustangs run harder and faster. Engine building techniques are included for street machines, drag racers, tow vehicles--for just about any Windsor-equipped Ford. Whether owners have a 289, 302/5.0L, or 351W/5.8L, Ford Windsor Small-Block Performance is the guide to performance success--on or off the strip.
