This is the third of three volumes of essential reference for those concerned with the installation and servicing of domestic and industrial gas equipment. This volume deals with the various aspects of installing and servicing industrial and commercial appliances and associated equipment. The revised fourth edition is brought fully up to date with current Standards, in line with requirements of the ACS Certificates of Competence and NVQs, and addresses the radical changes seen in the practice of soundness testing and purging of industrial and commercial gas installations in excess of, and below, 1m3, as well as strength and tightness testing and direct purging of small low pressure industrial and commercial natural gas installations. Also addressed in the new edition are important changes to standards for gas installation pipework, boosters and compressors on industrial and commercial premises; gas installation in educational establishments; LPG cylinders in mobile catering vehicles, service vehicles and similar commercial units; as well as flues and ventilation for larger gas appliances. Incorporating many illustrations and worked examples throughout the text, Volume 3 combines a concise reference with practical application in real-world engineering contexts to create an essential handbook for all aspects of the installation and servicing of domestic gas appliances, ideal for both students new to the field as well as professionals and none-operational professionals (e.g. Specifiers, Managers, Supervisors) as an ongoing source of reference. \* Comprehensive reference combined with practical application - an essential handbook for gas service technology \* Fully updated in line with the latest changes to Standards, NVQs and ACS Certificates of Competence \* Hundreds of line drawings and photographs maximise accessibility of the text, enabling readers to easily recognise the appliances under discussion

This book describes the domestic gas installation and servicing methods and procedures. It is intended for students and also for existing operatives, who are required to be assessment tested in gas service technology.

The second edition of Gas Installation Technology will be of interest to all concerned with gas installation work, whether plumbers, heating engineers or dedicated gas fitters. It continues to provide a definitive text for students taking NVQ gas installation and plumbing courses, and a useful reference for operatives renewing their gas competences. Brought fully up to date to comply with the latest regulations and best practices, it covers domestic, commercial and LPG installations, and provides essential information in a concise, readable, colourful and highly illustrated format. The new edition features enhanced diagrams and photographs to aid understanding. The second edition of Gas Installation Technology continues to be a companion to the author's highly successful textbook, Plumbing, and together both books offer plumbers, heating engineers and gas fitters, or students of these disciplines, unrivalled coverage of their subject. Fully revised to cover the latest legislation, best practices and current installation procedures, it covers domestic, commercial and LPG installations. Still the only textbook devoted to domestic gas, commercial gas and LPG installation. Concise and readable, heavily illustrated with colour diagrams and photographs to aid understanding and recall

This volume deals with the various aspects of installing and servicing domestic appliances and associated equipment. The revised fourth edition is brought fully up to date with current Standards and the Gas Safety (Installation & Use) Regulations to reflect recent developments in industry, in line with requirements of the ACS Certificates of Competence and NVQs. The book includes new coverage of the latest flexible pipe work for domestic installations, also outlining new procedures for tightness testing and purging. Brand new sections address gas installation in caravan and non-permanent dwellings, as well as boats, yachts and other vessels, in accordance with the Code of Practice for Domestic Butane and Propane Gas Burning Installations (BS EN 10239). Covering both Natural Gas (low and medium pressure), and Liquefied Petroleum Gas, Volume 2 reflects the new divisions to the Specifications for the Installation of Domestic Sized Gas Meters (BS 6400). The content is also fully in line with: \* The latest Building Regulations, restricting new central heating systems to high efficiency condensing

boilers. \* The specification for installation and maintenance of domestic direct gas-fired tumble dryers. \* Part “P” of the building regulations for electrical work on gas appliances (Competent person self-certification schemes, Part P Special locations and kitchens 2005). \* The install, exchange, disconnect, service, repair, breakdown and commission of domestic gas fired range cooker / hot water boilers. \* The install, exchange, disconnect, service, repair, breakdown and commission of gas appliances fitted with forced draught burners in domestic dwellings. Incorporating many illustrations and worked examples throughout the text, Volume 2 combines a concise reference with practical application in real-world engineering contexts to create an essential handbook for all aspects of the installation and servicing of domestic gas appliances, ideal for both students new to the field as well as professionals and none-operational professionals (e.g. Specifiers, Managers, Supervisors) as an ongoing source of reference. \* Comprehensive reference combined with practical application - an essential handbook for gas service technology \* Fully updated in line with the latest changes to Standards, NVQs and ACS Certificates of Competence \* Hundreds of line drawings and photographs maximise accessibility of the text, enabling readers to easily recognise the appliances under discussion
