There was no sharper con man on the streets of Chicago than Elijah Brookes. Women were his preferred prey—but no mark and no bankroll was safe when Elijah was on the prowl. Cool, beautiful Toni warned him, “Elijah, brothers be playin’ games so hard sometimes they don’t know when to stop. You know what I’m sayin’?” Elijah Brookes had to learn the ultimate lesson the hard way. So many games to be played, so little time.

OSHA (29 CFR 1910.119) has recognized AICHe/DIERS two-phase flow publications as examples of "good engineering practice" for process safety management of highly hazardous materials. The prediction of when two-phase flow venting will occur, and the applicability of various sizing methods for two-phase vapor-liquid flashing flow, is of particular interest when designing emergency relief systems to handle runaway reactions. This comprehensive sourcebook brings together a wealth of information on methods that can be used to safely size emergency relief systems for two-phase vapor-liquid flow for flashing or frozen, viscous or nonviscous fluids. Design methodologies are illustrated by selected sample problems. Written by industrial experts in the safety field, this book will be invaluable to those charged with operating, designing, or managing today's and tomorrow's chemical process industry facilities.

This is the first authoritative reference on rock mass classification, consolidating into one handy source information once widely scattered throughout the literature. It includes new, previously unpublished material and case histories, presents the fundamental concepts of classification schemes, and critically appraises their practical application in industrial projects such as tunneling and mining.

Sovereignty was a key issue in the baroque, and especially in the Dutch Republic with its incredibly complicated political organisation. Consequently, sovereignty was explored in and through Joost van den Vondel's theatre plays. Vondel sensed a fundamental problem in the construction of Europe's politico-cultural 'House'. The questions he asked with respect to that construction concerned the relationship between theology and politics, including in terms of gender and culture. Because these questions could barely be considered explicitly, let alone actually discussed, they had to be presented through literature theatre. A close reading of a number of plays reveals not only a pivotal discussion that concerns Vondel's own times, but also an on-going struggle in the European exploration of sovereignty. In that context, power and potency a distinction made by Spinoza determine the status of sovereignty that any body can acquire.
