Whatever your level of experience, The Dance Music Manual is packed with sound advice, techniques and practical examples to help you achieve professional results. Written by a professional producer and remixer, the book is organised into three accessible sections: Technology and theory If you're relatively new to the technology and theory behind today's dance music, Rick Snoman discusses the basics of MIDI, synthesis and sampling, as well as music theory, effects, compression, microphone techniques and sound design. Dance genres This section covers techniques for producing different musical styles, including Trance, Trip Hop, Rap and House. Snoman takes a close look at the general programming principles behind drum loops, basses and leads for each genre, in addition to the programming and effects used to create the sounds. Mixing and promotion Snoman guides you through the art of mixing, mastering, remixing, pressing and publishing your latest masterpiece. This includes a look at how record companies operate, copyrighting your material, pressing your own records and the costs involved. Finally, guest contributors offer essential advice on DJ'ing and how to create your own website to promote your music. The CD provides demo tracks showing what can be achieved when applying the advice contained in the book, including examples of the quality difference before and after mixing and mastering. The CD also contains free software demos for you to download. For even more advice and resources, check out the book's official website www.dancemusicproduction.com

Towes presents an introduction to the technology, as well a guide to implementation of successful applications. Part one provides ten quick steps to get readers familiar with the server. Part two explores the issues affecting appropriate integration of the Communication Server. Key concepts include understanding digital communication solutions, understanding objects, using server side ActionScripting, and more.

Este libro está diseñado y escrito para aquellas personas que, conociendo XHTML y JavaScript, desean dar un salto adelante en la creación de sitios web, con la programación dinámica en el lado del servidor. Atrás quedan los días oscuros en que las páginas de Internet eran meros documentos de texto e imágenes formateados de un modo rígido, y con unos contenidos inamovibles. Hoy los usuarios saben que pueden interactuar con páginas web, obteniendo los resultados que desean... y quieren disponer de esa prerrogativa. El autor ha reflejado aquí unos conocimientos prácticos y actualizados, para que usted pueda crear sitios realmente dinámicos y atractivos. Este libro no es, en modo alguno, una guía exhaustiva de todas las funciones de PHP. El manual oficial del lenguaje ya contiene toda esa información, muy bien clasificada. En lugar de ello, se ha buscado dar un enfoque práctico al aprendizaje de PHP 5 y MySQL, la práctica y la experiencia harán el resto. A través de las páginas de este texto, usted conocerá las técnicas necesarias para desarrollar e implementar sitios web realmente prácticos, útiles y eficientes. Pero esta obra va más allá. El autor ha conseguido hacerle llegar algunos conocimientos que no todos los programadores de PHP poseen, y que resultan de gran utilidad. Entre otras cosas, usted aprenderá que con PHP puede: Generar documentos en formatos RTP y PDF. Identificar la IP de los clientes que se conecten a sus páginas. Enviar correos electrónicos formateados en HTML (incluso, con JavaScript), en lugar de simple texto plano. Montar un foro de Internet en una hora de trabajo (o menos). Crear películas de Flash e integrarlas en sus páginas web... SIN NECESIDAD DE FLASH. Depurar con eficiencia sus códigos. Estas y muchas otras prestaciones estarán a su disposición, sin necesidad de invertir ningún dinero en herramientas ni técnicas adicionales, y por supuesto, cuando haya completado la lectura de este libro, tendrá los conocimientos necesarios para afrontar cualquier reto profesional que se le presente. Deseo que los conocimientos recopilados en este volumen le resulten tan fascinantes y útiles como me han resultado a mí. Si al concluir la lectura se ve usted capaz de llevar a cabo proyectos profesionales, me dará por satisfecho.
