Organizing the Spontaneous: Citizen Protest in Postwar Japan: Sasaki-Uemura, Wesley: Amazon.com.au: Books

In 1960 millions of Japanese citizens took to the streets for months of protest against the U.S.-Japan Security Treaty (Anpo) and its forcible ratification by the Kishi government. In the decades that followed, the Anpo era citizens' movements exerted a major influence on the organization and political philosophies of the anti-Vietnam War effort, local residents' environmental movements, alternative lifestyle groups, and consumer movements. Organizing the Spontaneous departs from previous scholarship by focusing on the significance of the Anpo protests on the citizens' drive to transform Japanese society rather than on international diplomacy. It shows that the movement against Anpo comprised diverse, at times conflicting, groups of politically conscious actors attempting to reshape the body politic.

Identifying a new approach to disaster response: spontaneous, compassionate, and impromptu actions to alleviate suffering. In Spontaneous Venturing, Dean Shepherd and Trenton Williams identify and describe a new approach for responding to disaster and suffering: the local organizing of spontaneous, compassionate, and impromptu actions—the rapid emergence of a compassionate venture. This approach, termed by the authors "spontaneous venturing," can be more effective than the traditional "command-and-control" methods of large disaster relief organizations. It can customize and target resources and deliver them quickly, helping victims almost immediately. For example, during the catastrophic 2009 bushfires in Victoria, Australia—the local disaster for the book—residents organized an impromptu relief center that collected and distributed urgently needed goods without red tape. Special bonds and friendships formed among the volunteers and victims; some were both volunteer and victim. Many victims were able to mobilize resources despite considerable personal losses. Shepherd and Williams describe the lasting impact of disaster and tell the stories of Victoria residents who organized in the aftermath of the bushfires. They consider the limitations of traditional disaster relief efforts and explain that when victims take action to help others, they develop behavioral, emotional, and assumptive resilience; venturing leads to social interaction, community connections, and other positive outcomes. Finally, they explore spontaneous venturing in a less-developed country, investigating the activities of Haitians after the devastating 2010 earthquake. The lesson for communities hit by disaster: find opportunities for compassionate action.

This book provides a reassessment of the significance of Max Weber's work for the current debates about the institutional and organizational dynamics of modernity. It re-evaluates Weber's sociology of bureaucracy and his general account of the trajectory of modernity, with reference to the strategic social structures that dominated the emergence and development of modern society. Included here are detailed analyses of contemporary issues such as the collapse of communism,fordism, coporalism and traditionalism in both Western and Eastern societies. All of the contributors are scholars of international repute. They undertake analyses of Weber's texts and his broader intellectual inheritance to reassert the centrality of Weberian sociology for our understanding of the moral, political and organizational dilemmas of late modernity. These analyses challenge orthodox readings of Weber as the prophet of the iron cage. Instead they offer interpretations of his work which emphasize the reality of modernity as a dual process with the potential for both disarticulation of rational structures and deeper colonization of daily life. Not only is this book essential reading for Weber specialists but it also provides compelling analyses of modernity and the inherently contingent nature of global cultural and stuctural transformation. Martin Albrow, Roehampton Institute; Stewart Clegg, University of Western Sydney; David Chalcraft, Oxford Brookes University; John Eldridge, Glasgow University; Larry J

Almost all the organizing books on the market today target the "left-brainer" - people who are generally disciplined, neat, and analytical. But for those who are more creative and spontaneous rather than logical and detail-oriented, help is on the way! In this book, Lee Silber turns traditional organizing advice on its head and offers unique solutions that complement the unorthodox lifestyle of the creative "right-brainer." For example: " Discover how right-brainers can be organized in a left-brain world " Overcome obstacles that stand in the way of being more organized " Pile, don't file - put paper in its place the right-brained way " Learn how being a "pack rat" can be a good thing This creative new approach to getting it together is perfect for those who can't relate to boring traditional organizing techniques!
