Advances in Stochastic Modelling and Data Analysis presents the most recent developments in the field, together with their applications, mainly in the areas of insurance, finance, forecasting and marketing. In addition, the possible interactions between data analysis, artificial intelligence, decision support systems and multicriteria analysis are examined by top researchers. Audience: A wide readership drawn from theoretical and applied mathematicians, such as operations researchers, management scientists, statisticians, computer scientists, bankers, marketing managers, forecasters, and scientific societies such as EURO and TIMS.

This book presents the latest on the theoretical approach of the contemporary issues evolved in strategic marketing and the integration of theory and practice. It seeks to make advancements in the discipline by promoting strategic research and innovative activities in marketing. The book highlights the use of data analytics, intelligence and knowledge-based systems in this area. In the era of knowledge-based economy, marketing has a lot to gain from collecting and analyzing data associated with customers, business processes, market economics or even data related to social activities. The contributed chapters are concerned with using modern qualitative and quantitative techniques based on information technology used to manage and analyze business data, to discover hidden knowledge and to introduce intelligence into marketing processes. This allows for a focus on innovative applications in all aspects of marketing, of computerized technologies related to data analytics, predictive analytics and modeling, business intelligence and knowledge engineering, in order to demonstrate new ways of uncovering hidden knowledge and supporting marketing decisions with evidence-based intelligent tools. Among the topics covered include innovative tourism marketing strategies, marketing communications in small and medium-sized enterprises (SMEs), the use of business modeling, as well as reflecting on the marketing trends and outlook for all

transportation industry segments. The papers in this proceedings has been written by scientists, researchers, practitioners and students that demonstrate a special orientation in strategic marketing, all of whom aspire to be ahead of the curve based on the pillars of innovation. This proceedings volume compiles their contributions to the field, highlighting the exchange of insights on strategic issues in the science of innovation marketing.

The conference proceedings contains contributions to the Logistics Management conference 2019. The objective of the LM conferences is to discuss new ideas and technical developments related to the management of logistic systems. A special focus is put on digitalization of supply chains and decarbonization in the transport industry.

This book is about promoting corporate responsibility in its original meaning: businesses should have a positive impact on society, and society should not only be a lever of making a profit. When we treat social responsibility as an external function of the core business, we are exposed to the worst. Business for Society seeks to redress the balance and promotes the original idea of corporate responsibility. This first book in the series of the same name sets the scene and presents the key theories across the various management disciplines to answer the following questions: 'How, why and under what conditions can business act for society?' The book narrows and discusses examples of businesses which are making impressive strides in delivering positive impacts for society as well as their bottom lines; but as the concept of corporate responsibility has become more mainstream in recent years, many organisations have adopted the term and reduced it to a marketing message. Areas covered include a historical perspective on the hijacking of business responsibility towards society, management knowledge and value, the Business for Society project against hijacking, accounting for society, finance for society and governance for society and democracy. The book will be of interest for scholars and students in the fields of corporate social responsibility, business ethics and governance.

The Law Library presents the complete text of the Modernization of Oil and Gas Reporting (US Securities and Exchange Commission Regulation) (SEC) (2018 Edition). Updated as of May 29, 2018 The Commission is adopting revisions to its oil and gas reporting disclosures which exist in their current form in Regulation S-K and Regulation S-X under the Securities Act of 1933 and the Securities Exchange Act of 1934, as well as Industry Guide 2. The revisions are intended to provide investors with a more meaningful and comprehensive understanding of oil and gas reserves, which should help investors evaluate the relative value of oil and gas companies. In the three decades that have passed since adoption of these disclosure items, there have been significant changes in the oil and gas industry. The amendments are designed to modernize and update the oil and gas disclosure requirements to align them with current practices and changes in technology. The amendments concurrently align the full cost accounting rules with the revised disclosures. The amendments also codify and revise Industry Guide 2 in Regulation S-K. In addition, they harmonize oil and gas disclosures by foreign private issuers with the disclosures for domestic issuers. This ebook contains: - The complete text of the Modernization of Oil and Gas Reporting (US Securities and Exchange Commission Regulation) (SEC) (2018 Edition) - A

dynamic table of content linking to each section - A table of contents in introduction presenting a general overview of the structure

This study of tangible and intangible cultural heritage explains the significance of nobles' conservationist traditions for public engagement with the history of France. During the French Revolution nobles' property was seized, destroyed, or sold off by the nation. State intervention during the nineteenth century meant historic monuments became protected under law in the public interest. The Journées du Patrimoine, created in 1984 by the French Ministry for Culture, became a Europe-wide calendar event in 1991. Each year millions of French and international visitors enter residences and museums to admire France's aristocratic cultural heritage. Drawing on archival evidence from across the country, the book presents a compelling account of power, interest and emotion in family dynamics and nobles' relations with rural and urban communities.

For the owner or professional mechanic. Complete information for performing all required service operations and overhauls. Covers all components. Engine sizes 327, 350, 427 and 454.

Does the Hot Wheels Beatnik Bandit come in antifreeze green? What is the difference between Johnny Lightning and Johnny Lightning/Topper cars? This book, will answer any collector's questions. Today's hottest die-cast lines are covered including Hot Wheels, Johnny Lightning, Matchbox, Racing Champions, Tootsie Toys, Corgi, Dinky, Masito and others.

Examining widescreen cinema as a worldwide aesthetic and industrial phenomenon, the essays in this volume situate the individual expressions of this new technology within the larger cultural and industrial practices that inform them. What Hollywood sought to market globally as CinemaScope, SuperScope, Techniscope, Technirama, and Panavision took indigenous form in a host of compatible anamorphic formats developed around the world. The book documents how the aesthetics of the first wave of American widescreen films underwent revision in Europe and Asia as filmmakers brought their own idiolect to the language of widescreen mise-en-scène, editing, and sound practices. The work of Otto Preminger, Anthony Mann, Samuel Fuller, Sam Peckinpah, Seijun Suzuki, Kihachi Okamoto, and Tai Kato, among others, is addressed.
