A critical issue in the origins of the Cold War—the development of Soviet—American conflict over Eastern Europe from 1941 to 1945—is the subject of Lynn Etheridge Davis's book. Disagreeing with those writers who argue that conflict arose from the determination of the United States to obtain economic markets in Europe or from imprecise assessments of Soviet security interests, the author describes how the United States made an initial commitment to the Atlantic Charter principles in 1941, then continued to promote the creation of representative governments in Eastern Europe without clearly identifying American interests or foreseeing the consequences of these actions. Using recently released documents of the Departments of State and War, Professor Davis explains how the views of U.S. officials on postwar peace precluded approval of Soviet efforts to establish a sphere of influence in Eastern Europe through the imposition of Communist regimes. She describes how American officials interpreted Soviet actions as intent to expand into Western Europe and how the subsequent undermining of Allied cooperation around the world led to the Cold War. The summation of more than two thousand years of one of the world's most august literary traditions, this volume also represents the achievements of four hundred years of Western scholarship on China. The selections include poetry, drama, fiction, songs, biographies, and works of early Chinese philosophy and history rendered in English by the most renowned translators of classical Chinese literature: Arthur Waley, Ezra Pound, David Hawkes, James Legge, Burton Watson, Stephen Owen, Cyril Birch, A. C. Graham, Witter Bynner, Kenneth Rexroth, and others. Arranged chronologically and by genre, each chapter is introduced by definitive quotes and brief introductions chosen from classic Western sinological treatises. Beginning with discussions of the origins of the Chinese writing system and selections from the earliest "genre" of Chinese literature--the Oracle Bone inscriptions--the book then proceeds with selections from: • early myths and legends; • the earliest anthology of Chinese poetry, the Book of Songs; • early narrative and philosophy, including the I Ching, Tao-te Ching, and the Analects of Confucius; • rhapsodies, historical writings, magical biographies, ballads, poetry, and miscellaneous prose from the Han and Six Dynasties period; •

the court poetry of the Southern Dynasties; • the finest gems of Tang poetry; and • lyrics, stories, and tales of the Sui, Tang, and Five Dynasties eras. Special highlights include individual chapters covering each of the luminaries of Tang poetry: Wang Wei, Li Bo, Du Fu, and Bo Juyi; early literary criticism; women poets from the first to the tenth century C.E.; and the poetry of Zen and the Tao. Bibliographies, explanatory notes, copious illustrations, a chronology of major dynasties, and two-way romanization tables coordinating the Wade-Giles and pinyin transliteration systems provide helpful tools to aid students, teachers, and general readers in exploring this rich tradition of world literature.

As the Cold War between the Western Democracies and Eastern communist Bloc commences, so does our story. The setting is war-ravaged Berlin in late 1946. From that devastated and divided city, spies from both sides began to move with relative ease throughout a Germany occupied by British, French, American and Russian military forces. America and its allies need to determine the composition and deployment locations of the military forces Russia has moved into the very heart of Western Europe. The Russians work diligently to deny the Western Powers knowledge of their intentions and strategies while consolidating their position in their new vassal states in Middle Europe including East Germany; their next objective is to make all of Germany into a communist satellite. Their ultimate goal is to spread communism to the rest of the world. Recently declassified documents have revealed the true nature and extent of the spy versus spy conflict that occurred from the mid-1940s through the early-1990s between the American CIA and British MI6 on one side and the Russian KGB and GRU (plus eventually the East German Stasi) on the other. In late 1946, Kurt Altschuler arrives in the divided city of Berlin. His job as an Associate Press News Agency reporter serves as a cover for his true role as a CIA agent. His first assignment is to establish a spy network that covers the Russian occupied zone of Germany. Two years later, during the Berlin Blockade, he meets Erica Hoffmann, an intriguing East German archeology student. Any relationship between a CIA agent and an East German woman is strictly forbidden; she might be part of a 'honey pot sting.' Love could not have found them at a worse moment. Their tempestuous relationship keeps Kurt in Berlin and on the front lines of the Cold War for the next thirteen years. The 1953 East German workers uprising which was violently suppressed by Russian tanks is a seminal event in Kurt and Erica's stormy love life. The next year, Kurt is tasked with managing the construction of the first Berlin Tunnel; if successfully completed, it would allow the British MI6 and the CIA to monitor communist communication throughout Russian occupied Europe. Ultimately Kurt becomes Chief Operations Officer for CIA Station Berlin. In that capacity, he manages the EAST-WEST spy-versus-spy interactions in Berlin for years. His experience allows him to direct his subordinates when the Berlin Wall is closed, the Berlin Crisis occurs, and a second tunnel is built into East Berlin. He yearns for action and even risks brief excursions behind the Iron Curtain. The novel begins and ends with a deadly confrontation between Kurt, a rogue CIA agent, and three Stasi Agents in an abandoned warehouse in East Berlin.

The Department of History at the University of San Diego in California presents a summary of the beginning of the Cold War. The summary describes the Yalta Conference, which was a meeting toward the end of World War II between the Allied leaders that involved discussions about the end of the war and division of Germany.

Bogen fremstiller centrale konflikter og traktater, der efter forfatterens opfattelse har været de væsentlige årsager til den kolde krigs begyndelse.

Winner of the 2018 American Academy of Diplomacy Douglas Dillon Award Shortlisted for the 2018 Duff Cooper Prize in Literary Nonfiction “[A] brilliant book...by far the best study yet” (Paul Kennedy, *The Wall Street Journal*) of the gripping history behind the Marshall Plan and its long-lasting influence on our world. In the wake of World War II, with Britain’s empire collapsing and Stalin’s on the rise, US officials under new Secretary of State George C. Marshall set out to reconstruct western Europe as a bulwark against communist authoritarianism. Their massive, costly, and ambitious undertaking would confront Europeans and Americans alike with a vision at odds with their history and self-conceptions. In the process, they would drive the creation of NATO, the European Union, and a Western identity that continue to shape world events. Benn Steil’s “thoroughly researched and well-written account” (*USA TODAY*) tells the story behind the birth of the Cold War, told with verve, insight, and resonance for today. Focusing on the critical years 1947 to 1949, Benn Steil’s gripping narrative takes us through the seminal episodes marking the collapse of postwar US-Soviet relations—the Prague coup, the Berlin blockade, and the division of Germany. In each case, Stalin’s determination to crush the Marshall Plan and undermine American power in Europe is vividly portrayed. Bringing to bear fascinating new material from American, Russian, German, and other European archives, Steil’s account will forever change how we see the Marshall Plan. “Trenchant and timely...an ambitious, deeply researched narrative that...provides a fresh perspective on the coming Cold War” (*The New York Times Book Review*), *The Marshall Plan* is a polished and masterly work of historical narrative. An instant classic of Cold War literature, it “is a gripping, complex, and critically important story that is told with clarity and precision” (*The Christian Science Monitor*).

In *Defending Democracy in Cold War Finland*, Marek Fields offers an account on the various informational and cultural strategies Britain and the United States used during the early Cold War decades in order to increase their influence in Finland.

This book provides a thrilling history of the famous priority dispute between Gottfried Wilhelm Leibniz and Isaac Newton, presenting the episode for the first time in the context of cultural history. It introduces readers to the background of the dispute, details its escalation, and discusses the aftermath of the big divide, which extended well into the Early Challenges and the story is very intelligibly explained - an approach that offers general readers interested in the history of sciences and mathematics a window into the world of these two giants in their field. From the epilogue to the German edition by Eberhard Knobloch: Thomas Sonar has traced the emergence and the escalation of this conflict, which was heightened by Leibniz’s rejection of Newton’s gravitation theory, in a grandiose, excitingly written monograph. With absolute competence, he also explains the mathematical context so that non-mathematicians will also profit from the book. *Quod erat demonstrandum!*
