Water Companies | Veolia UK
Report On The Proposed
Merger
Vivendi Water UK Ltd, (previously
General Utilities plc) had an interest in
four water-only companies, while First
Aqua Limited owned Southern Water
Services Limited, a water and sewerage
company.

This report investigates the proposed
acquisition of First Aqua (JVCo) Ltd by
Vivendi Water UK PLC (VWUK). JVCo
owns Southern Water Services Limited, a
regulated provider of water and sewerage
services in south-east England. VWUK is
part of a French-based multinational
company with interests in the media and
communications industries. It owns three

regulated water companies in England and Wales and has significant holding in a fourth, South Staffordshire Group PLC.

The report finds that the proposed merger may be expected to operate against the public interest because it would weaken the comparative system used by the Director General of Water Services in order to promote low prices, efficiency and high service standards amongst water companies. Four members of the Report Group conclude that the detriment caused is not sufficient to justify prohibiting the merger, and recommend VWUK be required to sell its stake in South Staffordshire Group PLC as a remedy. However, a fifth member of the group finds the detriment to the public interest to be of much greater significance and recommends that VWUK should be required to sell another company in addition. His statement of dissent is

The second edition of this book provides a definitive statement of the law relating to UK merger control following the wide-ranging changes to the merger control system being introduced by the Enterprise Act, during the second half of 2003

This text introduces the reader to the principles and practice of merger control in the EC and the UK. It deals clearly with both of the new regimes, providing a discussion of the policy and the relevant legislation, clarified through an analysis of pertinent cases and decisions. The aim is to provide the non-expert reader with a thorough and accessible introduction to the subject. The book deals first with matters common to both regimes, including relevant economics, and then focuses on the EC and UK systems as separate

entities. In each case the text covers qualifying mergers, including principles of territorial jurisdiction, substantive tests, procedures, appeals, and third party rights, as well as the link between the UK and EC regimes. The book is up to date to 31 July 2006. Substantial appendices provide most of the relevant core legislation in one convenient place.

This book is a fully up-to-date, comprehensive guide to the law, economics and practice of UK merger control law. This guide presents an integrated legal and economic assessment of the substantive appraisal of mergers and examines in detail the following topics: the history of the Enterprise Act and its development from the Fair Trading Act; the various regulatory bodies that form the institutional structure of the UK merger control regime; enterprises subject to

merger control regulation and the jurisdictional thresholds of the Enterprise Act; the relationship of the Enterprise Act with the European Merger Regulation; public interest mergers and the role of the Secretary of State; and merger remedies. All recent legislative developments including the merger of the OFT and the Competition Commission and the Enterprise and Regulatory Reform Act 2013, as well as all relevant case since the first edition of the magisterial text are explored.

Comprehensive commentary on the past year's major developments in EC and national antitrust law. Topics covered include: Vertical restraints; Horizontal agreements; Abuse of market power; Mergers and acquisitions; Joint ventures; State aid; Policy and procedures.

Since the early 1990s, the achievement of "good governance" has been a dominant discourse in the pursuit of social and economic development. This book presents a critical challenge to the contemporary development paradigm of good governance. Based on original ethnographic fieldwork on urban water governance reforms in south India (Karnataka), the book examines the two propositions that underlie the current good governance debate. The first refers to a claim that good governance is both democratic and pro-market. The second to the claim that commercially-oriented water services, whether private or public, are good for poor and marginalised citizens. The book analyses these propositions as they intersect on three levels: policy, practice (process) and outcome. It argues that a number of tensions and contradictions exist within

and between what the discourse promises, the everyday practises of how good governance policies are implemented and in the outcomes of such. It reveals the networks of power and the complexity of local reforms and their relation to global discourses as well as the motivations and every day practises of those who currently possess the power to reform. The book is of interest to academics in the fields of Development Studies, Asian Studies and Comparative Politics.

Michael Crew and David Parker have compiled a comprehensive, up-to-date and detailed analytical work on leading research issues in the economics of regulation. With contributions from international specialists in economic regulation, the Handbook provides a comprehensive discussion of major developments in both the theory and

practise of regulatory economics. This book will be an indispensable source for both students and practitioners of regulation. The Handbook begins by looking at the principles, history and methods of regulation before turning to specialist themes including: pricing and social welfare regulating service quality consumer representation performance benchmarking environmental regulation calculating the cost of capital information revelation and incentives the economics of access charging regulatory governance regulatory policy in developing countries particular issues in the regulation of the telecommunications, energy, transport and water sectors. The International Handbook on Economic Regulation is essential reading for researchers in the economics of regulation and students of regulation on final year undergraduate and postgraduate degree courses. As a major reference

work, it is of value and assistance to economists in regulatory offices, regulated companies and government departments.

This book explores the important role that economic performance measurement is playing in the regulation of network utilities in many countries today. The contributors to the book - researchers from academia, regulatory agencies and consulting firms - address the use of efficiency measures in price regulation and in assessing the effects of past regulatory reforms. Industries examined include electricity supply, water supply, telecommunications and airlines, across a range of countries including the USA, UK, Norway, the Netherlands, Australia and New Zealand.
